My name is Mike g Papa . I am in favor of sb no 234 an act establishing a pilot program for curbside food waste collection used in anaerobic digesters. I feel it is an innovative strategy moving forward in a positive way toward allowing nature to collaborate toward Keeping our planet clean and at the same time reduce the chronic diseases ((witch will eventually take over if we fail to manage our ecosystem landscape.)) It is IMPERATIVE that Connecticut be among the first to take a leadership role in this regard defending the integrity of nature for the health of future generations must be our goal ! Sincerely. Mike g Papa. 203-252-1954
